

PSYC - Psychology | Grad

PSYC 5000 Bases of Counseling Psychology (3)

This course provides an introduction to the field of counseling psychology. Topics addressed include the history of the discipline, professions within it, and how counseling psychology relates to other disciplines in psychology and mental health. Participants learn about the development of the profession, examine the counseling process and the importance of the therapeutic relationship, discuss ethical and professional issues, and learn to understand the role of research and science in the field. In addition, students learn basic counseling and communication

statistical research (master's thesis). The course (1) provides a practice-oriented overview of selected procedures and of quantitative and qualitative research methods, and (2) provides the possibility to develop ideas and skills for conducting one's own research and analyzing one's own data. Wherever possible, the course considers actual research issues which participants currently encounter. For practice purposes, the use of thesis data and work on other research problems in which student may be engaged is explicitly encouraged.

PSYC 6000 Special Topics in Counseling Psychology (1-3)

This course introduces students to topics of special interest within the field of counseling psychology. The course may be presented as a one credit hour course focused on a particular counseling topic. May be repeated for credit if content differs.

PSYC 6100 Master's Thesis (3-6)

The master's thesis consists of an individual research project designed by the student and carried out under the direction of a thesis faculty advisor. The thesis project allows students to contribute to the research in the field and to gain important research experience necessary for entrance into a doctoral program. All thesis topics need to be approved by the thesis advisor and the department. Students are expected to develop a topic, design the study, obtain IRB approval, collect and analyze data, and report the results of their research in APA format. Following completion of the thesis, students are encouraged to submit their work for possible publication. In addition to the individual feedback and support they receive from their thesis faculty advisor, students working on a thesis participate regularly in the monthly meetings of the departmental research series (consisting of psychology faculty, thesis students, and invited guests) where their work is presented and critically discussed. May be repeated for credit.

PSYC 6200 Practice and Supervision (1-3)

This course provides students with the opportunity to learn and develop their counseling skills by systematically observing peers and experts in counseling interactions, by providing observations and feedback to others, and by systematically analyzing their own and others' counseling experience. A significant part of this class is based on activities and exercises in the counseling lab, supported by modern technical equipment. This course
