Supply Chain Management (MS)

This program is offered by the George Herbert Walker School of Business and Technology. It is available online.

Program Description

Supply chain management is the foundation for enterprises to develop and deliver goods and services. This program will provide learnings of the end-to-end supply chain from a global perspective delivered through 10 courses covering multiple supply chain disciplines. Through the use of various learning tools and technology students will gain comprehensive knowledge in the areas of global operations, planning, production, operations management, procurement, inventory management, transportation, warehouse, enabling technology, analytics, project management, lean operations, sustainability, and the opportunity to become SC Pro Level 1 certified through the Council of Supply Chain Management Professionals if the student chooses to take the CSCMP exam after completion of BUSN 6400. Upon graduation, students will be able to apply their learnings cross
